

## 2021 CORN SEED TREATMENT EQUIPMENT OFFER

At NewLeaf Symbiotics, we believe the Terrasym platform offers growers a better, more cost-effective method to increase crop productivity than today's biologicals. This easy-to-use platform is priced for broad acre adoption and helps growers optimize in-season crop performance while increasing yield. We're so confident in Terrasym's effectiveness that we're offering an exclusive incentive to you!

In 2021, we're supporting the value of Terrasym 450 overseed treatment for corn with exclusive equipment funding. The enhanced margin opportunity with an average yield advantage of 5.9 Bu/A and a 79% win-rate, makes this a deal you don't want to miss!

**TREAT WITH TERRASYM 450 & EARN 50¢ PER ACRE TO COVER  
UP TO 50% OF YOUR NEW CORN TREATER!**

### PROGRAM DETAILS

- Participants that treat Terrasym 450 for corn will earn 50¢ per acre to cover up to 50% of the cost of a corn treater
- Participants have 3 years to earn the amount of up to 50% of the seed treater
- Incentive based on sales from the retailer to farmer
- Participant provides NewLeaf a report\* by July 31, 2021 and NewLeaf will write a check by September 30, 2021.

*\*Dealer to work with local Terrasym representative to determine the best format for reporting acres sold*
