

## 2022 FARMER SATISFACTION PROMISE

**ADOPT TERRASYM® ACROSS YOUR BUSINESS WITH CONFIDENCE!**

NewLeaf Symbiotics® stands behind the science of its Terrasym product line for corn and soybean. And, now with a convenient planter box application method, we are confident that Terrasym has what you need for your crops.

To enable farmers to take a full look at this innovative microbial technology, NewLeaf Symbiotics is offering new customers our Farmer Satisfaction Promise for the 2022 season to remove any potential perceived risk the farmer may have around technology adoption. If a farmer does not have an economic return that covers the cost of Terrasym and meets all of the 2022 qualification requirements, NewLeaf will provide the farmer with free product for the 2023 season. *This program is only available for new farmers and retailers utilizing Terrasym across 1,000+ combined acres.*

### AT A GLANCE

#### YOUR NEXT ON-FARM TRIAL

- Trial design can vary by field and/or operation
  - **Soybean:** At minimum, split the field (see examples 1 and 3)
  - **Corn:** Split planter (i.e, 24 row planter, 12 row head), side-by-side, block, strip trial
- Requires 1-2 validation fields per crop where Terrasym treatment/ application is the only differing variable\*
- Supply digital proof including yield outcome and treatment location to field a claim, i.e., raw field data or harvest summary reports from any digital platform

\*If treated acres exceeds 2,500, the farmer works with their local retailer to agree upon a plan for the number of validation fields per crop

## 2022 QUALIFICATION DETAILS

### ELIGIBILITY

- NewLeaf will ensure the farmer has a positive financial return by using eligible Terrasym-based products on their acres, which include: Terrasym 401, 409, 450 (as standalone or as copack with Talc U.S.A. 80/20), Terrasym 401 + DUST, and Terrasym 450 + DUST.
- If a farmer who purchased Terrasym from a qualifying retailer does not have an economic return that covers the cost of the Terrasym product(s), NewLeaf will provide the farmer with free product for the 2023 season on redeemed acres.
- In order to be reimbursed, farmers must submit FieldView, Granular, Deere, Case, AgLeader, or other yield monitor digital data for any claimed fields that do not provide an economic return.

PRODUCT	Terrasym 401*	Terrasym 409*	Terrasym 450*	Terrasym 401 DUST	Terrasym 450 DUST
COST PER ACRE	\$4.35	\$4.35	\$4.35	\$4.35	\$4.35

\*eligible as standalone or as copack with Talc U.S.A 80/20

### HOW TO PARTICIPATE

- The farmer splits the field. Either half of the field receives an application and half does not, or the planter is split where half of the field receives an application and the other half does not.
- Seed treater or farmer sends one cup of Terrasym-treated seed to a third party to verify presence of product on seed (details communicated in Satisfaction Promise checklist, outlined on the next page).
- Measurement uses the average across all acres (if multiple fields/farms, in aggregate).
- Submit claim electronically to NewLeaf at [satisfactionpromise@newleafsym.com](mailto:satisfactionpromise@newleafsym.com) by December 1, 2022. Free product will be shipped by March 1, 2023 on redeemed acres. Contact NewLeaf via the email above or reach out to your local Terrasym rep for a claim submission form.

## SATISFACTION PROMISE CHECKLIST

1. Enroll your dealership in the 2022 Satisfaction Promise at [terrasym.com](https://terrasym.com).
2. Send a one (1) cup sample of treated seed to a third-party (listed below) for validation within 10 days of treating seed with Terrasym 401 , 409, 450 (as standalone or as copack with Talc U.S.A. 80/20), Terrasym 401 + DUST, and Terrasym 450 + DUST. NewLeaf Symbiotics will provide you with a sample kit upon enrollment.  
*Eurofins BioDiagnostics Inc.*  
*1821 Vista View Drive*  
*Longmont, CO 80504*
3. Solidify a trial design which includes validation fields and a plan for measurement via a digital ag platform (i.e., Climate FieldView, Granular, John Deere, etc.). Notes on trial design:
  - **If treated acres are less than 2,500 acres:** A farmer must have at least 1-2 validation fields\* per crop per Terrasym treatment/application.
  - **If treated acres exceeds 2,500 acres:** A farmer must work with their retailer and/or Terrasym rep to determine the appropriate number of validation fields\* per crop per Terrasym treatment/application.*\* Validation fields must be planted as a split field (i.e. side-by-side or block trial) or split planter (i.e., 24 row planter, 12 row head) where the Terrasym treatment/application is the only differing variable.*
4. Supply digital proof including yield outcome and treatment location to field a claim, i.e., raw field data or harvest summary reports from any digital platform.
5. Submit claim electronically to NewLeaf Symbiotics at [satisfactionpromise@newleafsym.com](mailto:satisfactionpromise@newleafsym.com) and sign the terms and conditions by December 1, 2022.
