

# terrasym<sup>®</sup> 450 for CORN

Terrasym<sup>®</sup> 450 is a bacterial inoculant for use in agriculture for corn during critical stages of development. When applied, Terrasym 450 allows plants to more effectively utilize nutrients.

## DIRECTIONS FOR USE

### PLANTER BOX/HOPPER BOX APPLICATION:

The recommended application rate is 0.125 oz. (3.5 g) per one unit of corn (80,000 seeds per unit). Apply by dispersing the powder evenly onto seed using appropriate equipment. Preferred application is for Terrasym 450 to be pre-mixed with a labeled rate of seed lubricant of choice for uniform seed coverage. It can also be applied as a stand-alone technology.

**Terrasym 450 can be applied in all planter types.**

### GUARANTEED ANALYSIS

#### SOIL AMENDING INGREDIENT

#### ACTIVE INGREDIENTS:

MICROBIAL CONTENT ..... 2%

*Methylobacterium gregans* .....  $1 \times 10^8$  cfu/g

INERT INGREDIENTS ..... 98%

### SEED TREATMENT:

Mix 0.5 oz. (14 g) of product in water to treat one unit of corn (80,000 seeds per unit). Apply using appropriate equipment.

No additional specific markers or distinguishing features of seed coating are needed.

Read the entire front and back label before using this product. Use only according to label directions. To the extent consistent with applicable law, this product shall not be reverse engineered or used by buyer for research purposes.
