

**Terrasym® 401 + DUST™ is a bacterial inoculant for use in agriculture for soybean during critical stages of development.**

**WHEN APPLIED, TERRASYM 401 + DUST:**

- ✓ Allows plants to more effectively utilize nutrients
- ✓ Provides seed lubricant and seed flow aid during planting or seeding

**DIRECTIONS FOR USE**

**PLANTER BOX/HOPPER BOX APPLICATION:**

The recommended application rate is 0.5 oz. (14 g) per unit of soybean seed (140,000 seeds per unit). Apply by dispersing the powder evenly onto seed using appropriate equipment. Terrasym 401 + DUST can be applied in all planter types except brush meter soybean units.

No additional specific markers or distinguishing features of seed coating are needed.

Read the entire front and back label before using this product. Use only according to label directions. To the extent consistent with applicable law, this product shall not be reverse engineered or used by Buyer for research purposes.
